

# Loss Adjusting

You'd be lost without it.

  
**AQUARIUM**  
we're ready

# Aquarium... the multi-functional, cloud-based loss adjusting software

Every Loss Adjuster has their own way of making the process as quick, easy and efficient as possible.

Some use variations on software first developed years ago...and now beginning to creak a little. Others use their own home-grown systems complete with inevitable in-built limitations. But now there's a new state-of-the-art software solution that's infinitely flexible, adapts to your own unique It makes sure you, the insurer and the insured are all in the loop...all of the time.

It even raises your invoice when the job is done. And when the insurer is using Aquarium too, it dovetails seamlessly for even more time and cost efficiencies. Cutting overheads...cutting costs Because Aquarium is cloud-based, there's no need to invest in additional hardware or commit to the fixed expense of buying software that will immediately be out of date.

With Aquarium you just pay a simple monthly fee and immediately start enjoying all the benefits of an automated Loss Adjusting system that constantly upgrades itself...keeping you at the cutting edge of technology. But this is only the start of your savings... requirements...then cuts out unnecessary operating costs, frustrating administration, and expensive wasted time. What it puts in the palm of your hand are all the tools you need to gain competitive advantage, client confidence, new business...and more profit. It's

called Aquarium...the latest in an impressive line of software innovations from one of the world's leading innovators in the insurance software industry.

## Get to grips with enhanced efficiency

Aquarium is a true cloud-based platform that allows you to operate quickly, efficiently and effectively...whether you're at your desk or on the move. It provides you with all the prompts, information and reminders you need. It pulls together appointments.. and diaries important events and timelines.

It allows you to prepare draft, preliminary, interim and final reports with maximum ease and minimum fuss.

It makes sure you, the insurer and the insured are all in the loop... all of the time.

It even raises your invoice when the job is done. And when the insurer is using Aquarium too, it dovetails seamlessly for even more time and cost efficiencies.

## Cutting overheads... cutting costs

Because Aquarium is cloud-based, there's no need to invest in additional hardware or commit to the fixed expense of buying software that will immediately be out of date.

With Aquarium you just pay a simple monthly fee and immediately start enjoying all the benefits of an automated Loss Adjusting system that constantly upgrades itself...keeping you at the cutting edge of technology. But this is only the start of your savings...

## Cutting overheads... cutting costs

- Improved management reporting reduces operating costs
- Client service is hugely enhanced through transparency and the smooth, fast flow of information
- Time saved means you can service more business... without increasing overheads

- Helps you meet with FSA regulatory compliancy... like responding to post within 5 days
- Allows you to satisfy and report on agreed SLA's, for example client contact within 45 minutes and a
- report within 3 days of initial site visit
- Introduces reporting efficiencies that significantly reduce reporting costs
- Downward cost pressure helps retain profit margin... without affecting service levels

All of which adds up to securing an even better relationship with your existing clients...and making you a seriously attractive proposition to new business too.
